

ATHENA™

850 BL

Athena 850 bi-levelling tracked scissor lift

Operating safely on inclines up to 20 degrees with two-axis automatic levelling constantly monitored to ensure safety

ALL ACCESS HIRE

HIRE - SALES - SERVICE

The bi-levelling compact tracked scissor lift is the first scissor lift in the world with the unique capability to level on its axis in longitudinal and lateral directions, allowing it to operate on slopes and undulating terrain where conventional scissor lifts cannot operate.

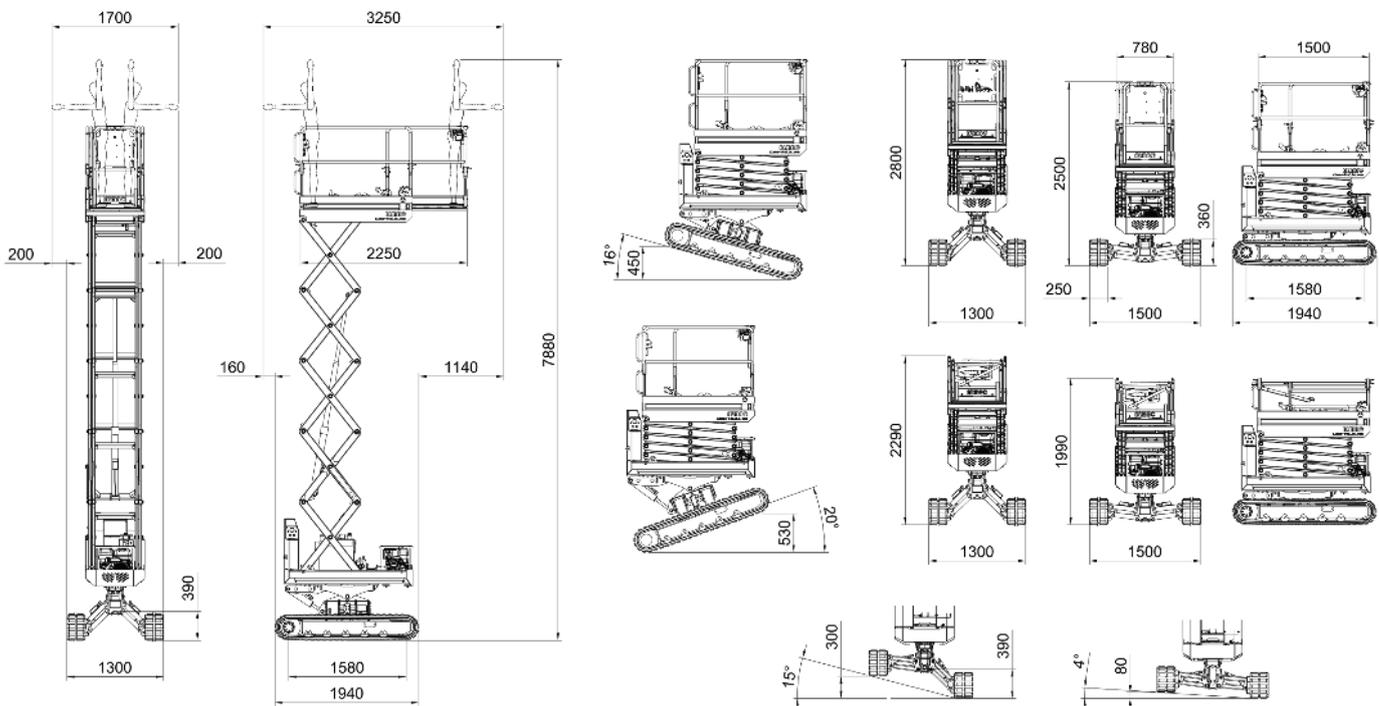

The Athena 850 scissor lift handles with assurance and safety, terrain variations up to 50cm front and back and 38cm side-to-side on uneven terrain, or inclines up to 20 degrees.

With a minimum operating width of 1300mm, basket capacity of 250kg and a maximum working height of 7.9m, the scissor lift is ideal for a broad range of applications.

Built tough for indoor and outdoor work, Athena's design and functional superiority removes limitations inherent in conventional mobile scissor lifts, greatly extending the machine's safety, versatility and value in the workplace.

Athena 850 Track Scissor Lift

- 8 metre working height
- 250 kg capacity
- Self leveling tracks
- Diesel powered
- 240 volt power pack
- Remote control
- White non marking tracks
- Perfect machine for uneven ground

Compact & easily towable

A collapsible cage means the Athena packs down to a small size making overhead transitioning easy. With a maximum weight of 1990 kg, it is easily towed by most work vehicles.

Dual power source

Use tools wherever you need to with a 220V electric pump for indoors and an onboard power source in the basket for when power isn't available. Also available in a lithium ion variation.

Extendable and collapsible basket

The extendable and collapsible basket is quick and easy to adjust for extreme access situations. Raise or lower the cage walls within five minutes to keep you on the move.
